SIX ENABLERS FOR ACTION

Governance and regulations
Establish a clear, centralised, transparent and secure governance.

Services ecosystem
Data valorisation in a trusted environment through tailored tools and services.

Talents and skills
Strengthen data-related skills, attract talent and provide training opportunities.

Research, development and innovation
Stimulate agile research through data sharing and cross-sector collaboration.

Infrastructures
Develop state-of-the-art infrastructures for a safe, secure and resilient digital environment and data exchange.

International collaboration
Serve as a central hub for international exchange and a centre of excellence for data.
